

# Introduction of Master's instructor

**Name:** Qiong Wang

**Professional title、 position、 academic degree and other natural conditions:**

Associate professor, Teacher of communication engineering specialty, Director of Telecommunication engineering specialty for international students.

➤ Graduated from the Department of radio engineering, Beijing University of Posts and Telecommunications in 1989, majored in wireless communication, and gained Bachelor Degree.

➤ Graduated from the Postgraduate School of Beijing University of Posts and Telecommunications in 2002, majored in electronic and information engineering, and received a master's degree.

➤ Had worked in running companies of Chinese telecommunication before 2004. And were senior engineer of Telecommunication.

➤ Studied in Victoria College of Business and Technology, Canada in 2010.

**Direction of research:**

Broadband communication network and mobile communication

**Teaching Courses:**

Broadband communication network, Mobile communication, Principles of communication, Optic fiber communication, New techniques of wireless communication

**Items of science research:**

Optimization of GSM wireless network,

Research of RFID radio frequency identification transmitter,

Signal Channel Estimation of MIMO-OFDM system based on IEEE802.11a.

**Academic papers :** The academic papers published in the "Telecommunications Engineering Technology and Standardization" , "Chinese New Communication" and other domestic and foreign professional journals. They are about wireless communication, optic communication, and LTE key techniques.
